The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

For a petition to be considered valid it must:

- 1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
- 2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
- 3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
- 4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : FW-22870

Stream : Lick Creek

Applicant : Indianapolis Power & Light

Gary Finchum

3700 South Harding Street Indianapolis, IN 46217-3333

Description : A 0.1 acre area will be filled in the north floodplain of Lick Creek for the

construction of entrance and exit gates, a 10' x 16' guard house, and six parking spaces. The fill will vary in depth from 0' on the streamward side where the proposed fill meets the existing access drive to 1.7' on the landward side. The fill will be set back from the channel of Lick Creek approximately 110'. The finished elevation of the fill pad will be 681', NGVD. The fill material will be clean fill. The finished floor of the guard house will be 682', NGVD. In addition, the existing 24' wide and 407' long gravel road will be paved. There are areas along the access road where a maximum of 1' of clean fill will be placed. Details of the project are contined in information received electronically at the Division of Water on May 5, 2004 and in plans and information received at the Division of Water on May 14,

2004 and August 16, 2004.

Location : Approximately 500' downstream of the South Harding Street stream crossing

DOWNSTREAM: at Indianapolis, Perry Township, Marion County NE¹/₄, SE¹/₄, SW¹/₄, Section 27, T 15N, R 3E, Maywood Quadrangle

Quad Code: 3908662

Application # : FW-23003

Stream : Cedar Creek

Applicant : Lake County Highway Department

Duane A Alverson

1100 East Monitor Street Crown Point, IN 46307-3521

Description : The existing single-span steel beam bridge carrying 171st Avenue over Cedar

Creek will be replaced with a new 3 span prestressed concrete box beam bridge with span lengths of 26.25', 27.75', and 26.25'. The structure will have an out-to-out length of 83.5' and a clear roadway width of 30'. The spill through abutments will have 2:1 sideslopes armored with revetment riprap over geotextile. The abutments and piers will be skewed 27 degrees to align with the streamflow. The new approach roads will be elevated a maximum of 4' above the existing approaches. The existing structure will be completely removed. Details of the project are contained in information and plans received at the Division of Water

on July 21, 2004.

Location : at the 171st Avenue crossing

Stream : Yellow Creek

Applicant : Joyce E Paxton

10020 South Loon Lake Drive Silver Lake, IN 46982-9262

Description : The existing 5.5' diameter x 25' long culvert will be replaced with a new culvert

system to reduce upstream flood damages. The new crossing will consist of a 6' diameter x 30' long culvert with straight ends. The new culvert will be placed on

floor of the ditch as old culvert. Minor channel shaping will occur both

downstream and upstream of the new culvert to improve the flow transition at the crossing. The shaping will be confined to the construction right-of- way. The reshaped areas will be stabilized with an rip rap/concrete/stones. The roadway will be elevated approximately 1' above the existing road elevations. Details of the project are contained in information received electronically at the Division of

Water on July 28, 2004.

Location : 10020 South Loon Lake Drive; immediately upstream of the Loon Lake control

structure

Stream : Unnamed Tributary White

Lick Creek

Applicant : Platinum Properties

Kenneth R Brasseur 9551 Delegates Row

Indianapolis, IN 46240-3807

Description

Stormwater outfall structures will be constructed along the south and north banks of White Lick Creek Tributary No. 3 (Lingerman Regulated Drain) to provide a outfall pipe for retention ponds to be constructed within the Wynne Farms residentail development. The proposed pipes will carry stormwater runoff from the Wynne Farms development, to the creek. All other parts of the Wynne Farms residential development, including said retention ponds, will be constructed landward of the floodway. A 18" and 36" reinforced concrete (RCP) outfall pipe will be buried to a depth of 5.5 ft and 6.0 ft, respectively, in the floodplain. The 18" RCP will be constructed for a distance of 48 ft within the regulatory floodway. The 36" RCP will be constructed for a distance of 440 ft within the regulatory floodway. The pipes will terminate with a reinforced concrete end section that will conform to the bank slope. A flapgate (will not be placed at the end of the pipe to prevent backflow into the on-site retention pond. An energy dissipator will be constructed at the base of the end section. The dissipator will consist of 6" diameter rock riprap, which will be installed to conform to the existing creek channel cross-section. Details of the project are contained in information received electronically at the Division of Water on August 17, 2004.

Location

The proposed 18" outfall will be located on the south bank of White Lick Creek Trib. No. 3, approximately 50 ft upstream of Co. Rd. 800 East. The 36" outfall will be located on the north bank of said creek, approximately 2300 ft upstream of Co. Rd. 200 North
